

Cataracts & Your IOL Options

See the big picture and the details.

Imagine reading, shopping, dining, and sightseeing all without the aid of glasses. With the breakthrough AcrySof® ReSTOR® lens, 4 out of 5 patients in the supporting clinical study reported never needing to wear glasses after surgery in both eyes. It's the lens for qualifying patients who want today's most advanced option.

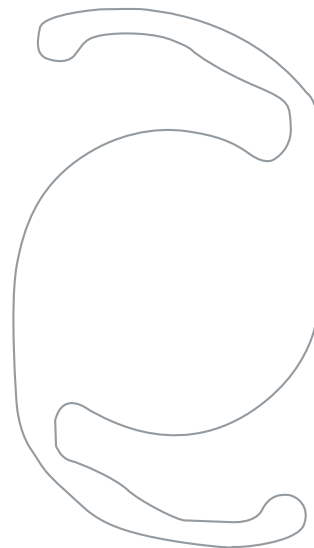

AcrySof
ReSTOR
apodized diffractive IOL

Correct cataracts and treat preexisting astigmatism in one step.

If you have astigmatism and are concerned primarily with improving distance vision, AcrySof® Toric eliminates the need to have two corrective procedures. It provides improved quality distance vision and decreased dependency on glasses as compared to traditional lenses.

AcrySof
TORIC
SINGLE-PIECE NATURAL IOL

Improved image quality.

The AcrySof® IQ lens uses more advanced technology than traditional monofocal lenses. It also incorporates unique optics to improve image quality and contrast.
